

Introduction:

Nowadays, cryptocurrency has created havoc and also developed a craze among various investors. Blockchain technology is finding its use across all industries worldwide and has finally proven that it is a technology that is here to stay. Strong Bull is a protocol and framework for creating and linking suitable blockchain networks. Bringing together scalable blockchain solutions to support a multi-chain ecosystem with layer one security.

Strong Bull is designed to handle one specific function well: the transfer of assets from one party to another. One goal of the Strong Bull protocol is to develop a use case-focused blockchain and development effort that can create code, providing advantages for specific use cases.

"We are building an Ecosystem, where everyone has a chance" Introduction:

Key Products

Strong bull combines the best of the non-fungible token (NFT) and the decentralized finance (Defi) space, bringing yield farming to game economies while adding value to these virtual worlds by developing the content and economy of these games.

You can buy, sell, mint, bid, and collect your favourite NFTs. Digital assets continue to rise in value, offering unique utility with each iteration. Strong bull is a multichain system that will safely keep your assets and rewards.

Strong Bull is a multi-chain system that merges the finest blockchains into one with POS.

Strong Bull addresses issues common to Blockchains, such as. High gas cost, Poor performance, etc. We strive to reduce obstacles by offering high speed and reduce expensive costs by providing robust layer 2 security.

Mission:

We strongly believe everything that is built & released must come with full disclosure. Strong bull team's mission is to build a system where creators can craft, play, share, and trade without central control, enjoying secure copyright ownership with the ability to earn.

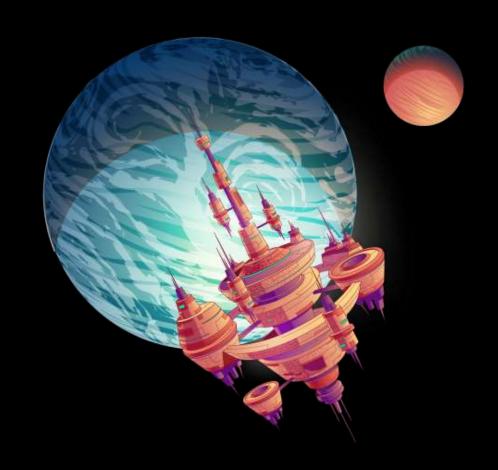

Game - Feel the new world of gaming:

Online video games have become more prevalent in recent years. According to the market reports, the global gaming market was valued at USD 173.70 billion in 2020 and is expected to reach USD 314.40 billion by 2026.

With the rising craze for gaming and gaming coins, Strong bull developed an ecosystem where creators can trade, share, play, and earn without any central control.

Our mission is to optimize value accumulation across several metaverse games. We're building a platform at the crossroads of capital, expertise, and players.

NFTs - World of collection:

Non-fungible tokens are unique digital goods that are stored in the blockchain. They are mainly used within the art market to prove the authenticity of digital works of art. As a result, NFT-based markets can emerge and gain traction quickly, especially relative to other crypto products.

This is both because the NFTs themselves have standalone value — you might buy an <u>art NFT</u> simply because <u>you like it</u> — and because NFTs just need to establish value among a community of potential owners.

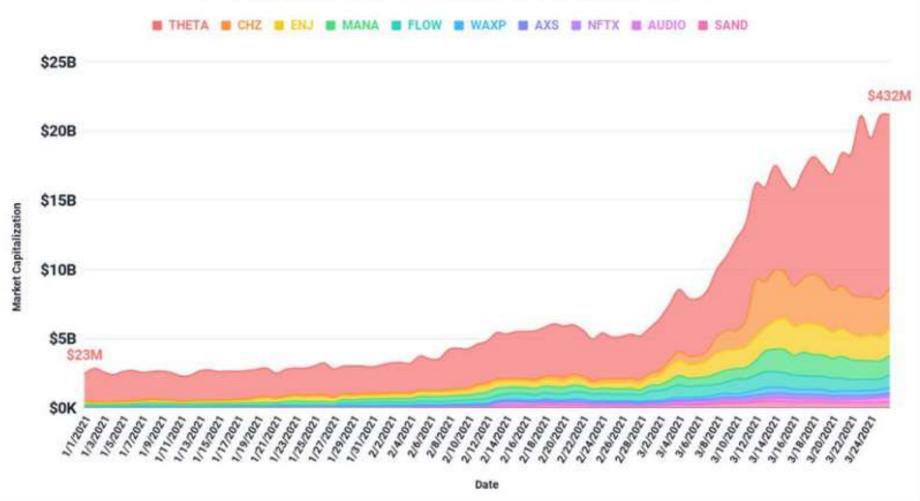

Speaking about the future of NFTs is bringing scarcity-based markets into the digital age. With tangibility and increased utility and liquidity among its pros, it will be easier to read the future value of NFTs and determine the viability of investing in them.

According to the market reports, The global non-fungible tokens market was valued at \$250 million in 2020 whereas in 2021 the market reached \$432million.

NFTs - World of collection:

The above graphs state that NFTs have become extremely popular and widespread for online gaming and other virtual reality applications, which is where mainstream adoption started Strong Bull adopted NFTs as they can bridge this connection by the very nature of how they operate.

The NFT items earned by users are assets that help them better enjoy the gameplay and are as crucial as fungible tokens. As users discern which items are the ones they need or may dispose of, they will reach a point where they want to trade items with other users.

Strong Bull provides a set of tools for the community to use. Each game will have its planet to manage and organize the tokens. In addition, we'll collect virtual land auctions, where players may own their piece of the world and earn money by completing specific game tasks.

These plots of land can be used in the future to build infrastructure for that planet, such as virtual NFT stores, collecting galleries, weapon stores, and the ability to buy and sell NFTs in the game.

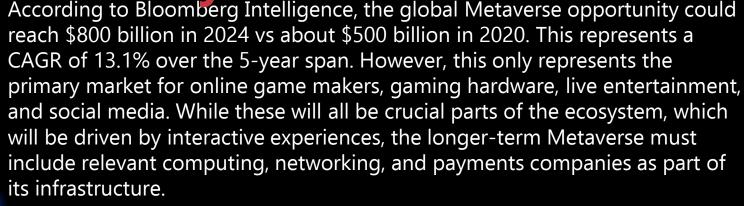

Metaverse - Land In Virtuality:

Decentraland is an online environment called a "metaverse" where users can buy land, visit buildings, walk around, and meet people as avatars. According to a new report from crypto giant grayscale, The metaverse has the potential to become a \$1 trillion annual revenue opportunity across the worlds of advertising, digital events, e-commerce, and hardware.

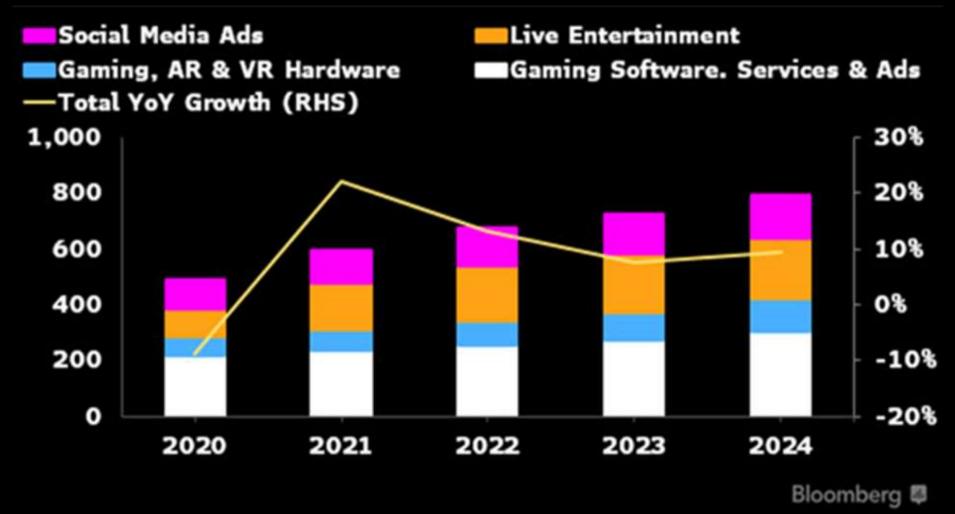

Metaverse - Land In Virtuality: According to Bloomberg Intelligence, the global Metaverse opportunity could

continue and bespoke companies capitalizing on the evolving opportunity will emerge. While we believe that the development accomplished by the middle of this decade could be in the \$800 billion range, incorporating these infrastructure companies and accelerating change more broadly could mean a \$2.5 trillion opportunity by 2030, resulting in a 17.5% CAGR between now and the end of the decade.

Metaverse

Metaverse

Adoption rates can vary immensely by income and geography. For example, the adoption rate for the internet, while nearly 100% in much of North America and Europe, is still below 30% in developing countries worldwide.

A 2020 report shows that gamers average 6.3 hours of play per week globally, with players from 18 to 45 averaging over 7 hours. This doesn't count the additional 3.5 and 4.6 hours weekly that women and men, respectively, spend watching other people play video games, with younger groups investing more hours. And as gaming grows, it iterates more quickly, weeding through new ideas faster and innovating in new directions, such as augmented and virtual realities. These innovations will port smoothly into the metaverse.

Blockchains and cryptocurrencies will become an integral part of the metaverse. A blockchain will allow transactions to be cryptographically secured. Gaming within the metaverse is aimed at building connections. It fosters the need for active communities.

Strong bull adopted metaverse to deliver an enjoyable and seamless gaming experience. Within the virtual reality world you are in, the Strong Bull token can be used to purchase assets. Buildings, vehicles, and houses are examples of assets that can be found in the market. Strong Bull works on multiple platforms, creating your virtual world with advanced technology unlock various opportunities.

Roadmap

Q4-2021

- 1. Strong Bull Contract creation
- 2. Website Live of Strong Bull
- 3. Fair Launch
- 4. Listing on Dex
- 5. White Paper Version 1
- 6. Audit Paper

Q1-2022

- 1. Bounty Program
- 2. Certik Audit
- 3. Influencer marketing
- 4. Public Article
- 5. Expansion of Listing
- 6. Listing on CEX exchange
- 7. BSC scan LOGO updation

Roadmap

Q2-2022

- NFT launch (BNB-SOL-POLY-ETH)
- 2. Listing on many more CEX exchange
- 3. Trust Wallet Listing
- 4. Huge Marketing
- 5. Give Away Of Strong Bull
- 6. Coingecko
- 7. Coin market Cap

Q3-2022

- 1. Fork of Blockchain
- 2. Strong Bull Blockchain Alpha version
- 3. NFT Market Place Alpha version
- 4. NFT Market Place Marketing

Roadmap

Q4-2022

- 1. NFT Market Place Beta Version
- 2. Redesign of website

Q1-2023

- 1. NFT Market Place Main Launch
- 2. Strong Bull beta version Launch
- 3. Give Away Of Strong Bull
